

## The “PV Doctor” surpasses 0.5 GWp and 1,000 Assets Under Management Across 15 Countries and 5 Continents

SINGAPORE, 15 July 2025.

PV Doctor Pte. Ltd. (“PV Doctor”), a Singapore-based platform for solar asset performance management, proudly announces a major milestone: over 500 MWp and 1,000+ PV systems are actively being monitored and analysed across 15 countries, now spanning 5 of the 7 continents, all within just a few months of commercial launch.

**Figure 1:** (Left) PV Doctor's portfolio as of July 2025 || (Right) PV Doctor's Singapore portfolio as of July 2025

Founded by a team of seasoned solar professionals, the PV Doctor has rapidly positioned itself as a trusted partner for asset owners, EPCs, and developers, offering a unique blend of AI-powered analytics, satellite-integrated diagnostics, and hands-on engineering expertise to maximise asset yield and reliability.

Grown out of 15+ years of research at the Solar Energy Research Institute of Singapore (SERIS), the PV Doctor consists of a dedicated team of 20 professionals (including engineers, programmers, scientists & interns) across Singapore, Thailand, and India to help asset owners, developers, and EPCs recover lost performance and safeguard long-term returns. The company has achieved this scale with speed and precision. But we're not stopping here: our next target is to reach 1 GWp of solar assets under management by the end of 2025.

*“Crossing the 0.5 GWp and 1,000-system mark across five continents is not just symbolic, it represents growing global confidence in smarter, data-driven solar asset management,”*

said Dr. André Nobre, Managing Director and Co-founder.

**Figure 2:** Dr. André Nobre introducing the PV Doctor at the 18<sup>th</sup> International Photovoltaic Power Generation Conference (SNEC 2025) in Shanghai, China, June 2025, the world largest PV exhibition & conference.

*"With our speciality not only as a data platform but also in real-world asset recovery, I truly appreciate the trust from our partners who keep turning to us for help with underperforming systems,"*

said Thornthanut Pakdeepinyo, Head of Business Development.

*"It validates our belief that solving solar issues takes both smart analytics and on-site expertise."*

With the recent addition of assets in three new countries, the PV Doctor now supports solar PV systems across Asia, Australia, Europe, North & South America, cementing its presence across five continents.

With strong momentum and trusted by key stakeholders in the solar value chain, the PV Doctor is set to redefine what intelligent solar asset management looks like, at scale and with precision.

As we continue working towards closing our next funding round, we are also expanding our thought leadership by sharing key findings through upcoming scientific conferences, where the PV Doctor's methodologies will be featured in renowned events. Catch us at:

- EU PVSEC 2025 – Bilbao, Spain
- Asia PVSEC 2025 – Bangkok, Thailand
- ISES Solar World Congress 2025 – Fortaleza, Brazil (part of COP-30)

## Unlocking More Value in Solar Assets – Together

As the PV Doctor surpasses 0.5 GWp of solar assets under management across five continents and over a thousand sites, the momentum is only accelerating. For asset owners and developers, this milestone is more than a number, it's proof that expert diagnostics and real-world action can recover lost value and protect long-term returns.

Whether you oversee a portfolio of commercial rooftops or a growing fleet of utility-scale plants, the PV Doctor offers a unique blend of smart analytics, seasoned field expertise, and zero-hardware onboarding to elevate system performance.

For investors, this rapid scale, achieved in just a few months by a compact yet very experienced team, signals not only strong product-market fit but also untapped potential in a global sector still plagued by underperformance. As the solar industry matures, the PV Doctor is well-positioned to become the trusted standard in asset performance management.

Now is the time to act. With over USD 11 billion in underperforming solar assets globally (Source: Raptor Maps report), the opportunity is too big to ignore. Together with our partners, asset owners and developers, the PV Doctor is here to restore performance and recover the energy you were promised.
