

PV Doctor Appoints Esteemed International Advisory Panel (IAP) to Enhance Strategic Guidance, Support Regional Expansion and Outreach

Singapore, 20 August 2025

PV Doctor Pte. Ltd. ("PV Doctor"), a leading provider of science-driven solar diagnostics and asset management solutions, is pleased to announce the formation of its International Advisory Panel (IAP) comprising three distinguished experts in photovoltaics (PV), energy systems, and clean technology strategy. The IAP will support PV Doctor's mission to maximise system performance and energy yield from solar assets across Asia and beyond.

Dr. Ian Marius Peters, an internationally renowned PV researcher, joins the IAP with over 20 years of experience in solar energy research at leading R&D institutions worldwide. He has authored more than 300 scientific publications and is a recipient of the prestigious Hamakawa Award and the European Research Council (ERC) Consolidator Grant. His work has significantly contributed to advancing solar technologies and performance modelling.

Mr. Pui-Sun Eu, a veteran in the Southeast Asian power sector, brings decades of leadership in the energy industry. He previously served as General Manager and Managing Director for the retail business of a major multinational power producer and has played a pioneering role in the early adoption of solar photovoltaics, electric vehicles (EVs), and renewable energy credits (RECs) in Singapore.

Dr. Shubham Duttgupta is a global leader in solar photovoltaics and advanced manufacturing, with 18+ years' experience across Australia, Singapore, and India. As Managing Director of BT Imaging in Sydney, he drives large-scale global deployment of AI-enabled luminescence-based inspection technologies. He offers deep technical expertise, commercial acumen, and governance insight, uniting academia, industry, and government to achieve sustainable, innovation-led growth.

"This International Advisory Panel brings together unparalleled expertise across research, industry, and policy," said Dr. André Nobre, Managing Director of the PV Doctor. "Their guidance strengthens our commitment to deliver advanced diagnostics and performance optimisation to solar asset owners operating in diverse and challenging environments."

With advisory support from these distinguished professionals, PV Doctor will accelerate its efforts to deploy advanced analytics, diagnostics, and rectification services to a growing portfolio of commercial, industrial, and utility-scale PV systems.
